# House Type Approval Certificate

Certificate No: **STAS/19/052/DM110/08** 

Date: 20 September 2021

A Certificate Holder:

**CALA Homes Ltd** 

Adam House, 5 Mid New Cutlins, Edinburgh EH11 4DU

E-mail: SKelso@Cala.co.uk Tel: 0131 453 0072

B House Type Titles:

Description: FLAT TYPE E - OPEN PLAN PV

The domestic type approval has been assessed on the following drawings and specifications:

See attached annexe to this certificate

|                   | <b>Climatic conditions:</b> The design may be built in areas where the climatic conditions are equal to or less than those detailed below: |   |                              |  |  |  |  |  |
|-------------------|--|---|------------------------------|--|--|--|--|--|
| Wind:<br>6399-    | (as defined in BS<br>2)  | Standard effective wind speed, Ve =   | 24.5 m/s                     |  |  |  |  |  |
|                   | -,   | For maximum effective height =  | 16m to ridge                 |  |  |  |  |  |
|                   |  | Has funnelling been considered?   | No                           |  |  |  |  |  |
|                   | (as defined in CP3:  | Design wind speed, Vs = (relevant to the building frame, at a height of 3m or less)   | 24.5m/s                      |  |  |  |  |  |
| Chapt             | ei v)  | (relevant to the building frame, at a neight of 511 of less)  |                              |  |  |  |  |  |
| <b>Snow</b> 6399- | : (as defined in BS<br>3)  | Site snow load, So =  | 0.75 kN/m2                   |  |  |  |  |  |
|                   | ,  | Influenced by adjacent buildings?   | No                           |  |  |  |  |  |
| moist             | tance to<br>ure/durability of<br>sed elements:   | Max exposure (to wind driven rain) grading, as defined in BRE Report – Thermal Insulation: Avoiding Risks, Second Edition, 1994, to be exposure zone: | Exposure Zones 1, 2, 3 and 4 |  |  |  |  |  |
|                   |  | Exposure to sea spray (i.e. coastal region) or de-icing salts?  | No                           |  |  |  |  |  |
|                   |  | Other air contaminants or biological factors – please specify any enhanced resistance if applicable (refer to BS7543 for guidance)                    | None                         |  |  |  |  |  |
|                   | n Life: (per BS 7543 – ility of buildings and  | Category of building design life =  | 60 years                     |  |  |  |  |  |
| buildir           | ng elements, products<br>omponents)  | Design life of primary building envelope  | 60 years                     |  |  |  |  |  |

#### E Conditions of certification:

- 1. The design shown and the specifications and materials referred to have been assessed and approved in accordance with the Building (Scotland) Regulations 2004 and in accordance with the supporting guidance in the Domestic Technical Handbooks which came into force with effect from 1 March 2021.
- 2. The certificate shall be valid until invalidated by formal notice by the Local Authority Building Standards Scotland
- 3. The design shown and the materials specified shall not be changed without reference to the Local Authority Building Standards Scotland responsible for certifying the system.
- 4. Where reference is made on a plan or specification document to any Code of Practice, British or European Standard or manufacturer's instruction it shall be construed as a reference to such publication in the form in which it is in force at the date of this certificate.
- 5. This certificate should not be regarded as a formal approval under the building warrant process prescribed by the Building (Scotland) Act 2003 enacted from 1 May 2005

## Local Authority Building Standards Scotland [LABSS]

formerly the Scottish Association of Building Standards Managers [SABSM]

- 6. The Harley Haddow Consulting Engineers Statement of Structural Adequacy referenced here under Section G, confirm that a structural appraisal has been carried out. It confirms that further site-specific information MUST BE made available when a site-specific building warrant is sought. Such additional information should take cognisance of Procedural Guidance on Certification including information to be submitted with a Building Warrant Application dated April 2010 Version 2 (January 2017). Confirmation of a holistic approach to structural adequacy of the <a href="mailto:entire-completed building">entire completed building</a> shall be provided by a registered engineer to the local authority within whose area the site-specific dwelling is to be built.
- This certificate should be read with the related certificate STAS/19/052/DM110/SD; STAS/19/052/DM110/SS; STAS/19/052/DM110/UCR
