

Date:

House Type Approval Certificate

Certificate No:

STAS/23/052/DM137/25 18 December 2023

А	Certificate Holder:									
	CALA Homes Ltd									
			New Cutlins	Edinburah						
		Adam House, 5 Mid New Cutlins, Edinburgh EH11 4DU								
		-mail: SKelso@Ca	la co uk		Tel: 0131 453 0072					
	L		1a.co.uk		161. 0131 433 0072					
В	House Type Titles:									
	Desc	ription:	2023 Regu	lations BLAIR DET 2023						
				DLAIN DL1 2023						
C	The	domestic type appr	oval has heen	assessed o	n the following drawings and specifications:					
	The domestic type approval has been assessed on the following drawings and specifications: See attached annexe to this certificate									
D					n areas where the climatic conditions are equal to or I					
	Wind	I: (as defined in BS	6399-2)	Standard effective wind speed, Ve = 47.5 m/s						
		. ,		For maximum effective height =		9m to ridge				
			Has funne	ling been considered?	No					
-	Winc	Wind: (as defined in CP3:		Design wind speed, Vs =		24.5m/s				
		oterV)	0.	(relevant to the building frame, at a height of 3m or less)		24.011/3				
	Chap	JUEI V)		(relevant to the building frame, at a neight of 5m of less)						
	Snow: (as defined in BS 6399-3)		6399-3)	Site snow	load. So =	0.75 kN/m2				
					by adjacent buildings?	No				
	Resi	stance to moisture/			sure (to wind driven rain) grading, as defined in BRE	Exposure Zones 1, 2, 3 and 4				
		sed elements:			Report – Thermal Insulation: Avoiding Risks, Second Edition,					
	•				e exposurezone:					
					o sea spray (i.e., coastal region) or de-icing salts?	No				
					ontaminants or biological factors – please specify any	None				
					resistance if applicable (refer to BS7543 for guidance)	None				
	Design Life: (per BS 7543 –				of building design life = Design life of primary building	60 years				
	Durability of buildings and building			envelope						
	elements, products and components)					60 years				
						, ,				
Е	Conditions of certification:									
	1.			ecifications and materials referred to have been assessed and approved in accordance with the						
				ns 2004 and in accordance with the supporting guidance in the Domestic Technical Handbooks which						
		came into forcev	vith effect fror	n 5 June 202	3.					
	2.	The certificate sl	hall be valid u	til invalidated by formal notice by the Local Authority Building Standards Scotland						
	3. The design shown and the materials specified shall not be changed without reference to the Local Authority Building Standards									
		Scotland respon				, ,				
	 Where reference is made on a plan or specification document to any Code of Practice, British or European Standard or 									
					ued as a reference to such publication in the form in whic					
		time at the point of construction.								
	5. This certificate should not be regarded as a formal approval under the building warrant process prescribed by the Building									
	(Scotland) Act2003 enacted from 1 May 2005									
	6. The Harley Haddow Consultin			ng Engineers Statement of Structural Adequacy referenced here under Section G dated 21 September						
				I appraisal has been carried out. It confirms that further site-specific information MUST BE made						
				building warrant is sought. Such additional information should take cognisance of Procedural Guidance						
		on Certification including information to be submitted with a Building Warrant Application dated April 2010 Version 2 (January 2017).								
	Confirmation of a holistic approach to structural adequacy of the <u>entire completed building</u> shall be provided by a registered engineer to the local authority within whose area the site-specific dwelling is to be built									
	-									
	7.			iance with Mandatory Standard 6.1, based on example criteria with regards to orientation, shading,						
					y. Site specific information will be required to confirm the	actual DER and DDER for the				
					n a particular site.					
				bliance with Mandatory Standard 3.28. This is based on actual 'worst case' criteria outlined within CIBSE						
	TM59 'Design methodology for		r the assessment of overheating risk in homes' (2017). On this basis, further site-specific information is							
		not necessary
